📍 Addis Ababa ,Ethiopia 🔗 portfolio

📄 Summary

Adaptable and results-driven **Full-Stack Software Engineer** with a Bachelor of Science in Software Engineering from Woldia University. Proficient in building scalable, secure, and high-performance web applications using modern technologies including Next.js, React, Node.js, and Java Spring Boot with Hibernate (JPA). Experienced in the full software development lifecycle—from UI/UX implementation and RESTful API development to database optimization and Docker containerization. Passionate about clean architecture, problem-solving, and delivering enterprise-grade digital solutions.

👛 Professional Experience

03/2025 – 07/2025
Addis Ababa,Ethiopia

Barok Tech 🔗

- **Frontend Development:** Built responsive, high-performance web interfaces and dynamic user dashboards using Next.js, Tailwind CSS, and modern JavaScript frameworks.
- **Backend Development & APIs:** Developed scalable backend logic, designed and implemented robust RESTful APIs using Node.js and Laravel.
- **Database Management:** Designed, integrated, and optimized relational and non-relational database schemas (PostgreSQL, MySQL, and MongoDB) for efficient data handling.
- **Security & Integration:** Integrated third-party APIs and implemented secure authentication and authorization systems.
- **DevOps & Deployment:** Utilized Docker for containerization and deployment, ensuring reliable and consistent production environments.
- **Testing, Maintenance & Documentation:** Performed rigorous debugging, software testing, maintenance, and actively participated in system requirements analysis and project documentation.
- **Team Collaboration:** Collaborated closely with multidisciplinary and cross-functional teams using Git-based version control to deliver client projects on schedule.

🎓 Education

09/2021 – 07/2026
Woldia ,Ethiopia

Software Engineering

Woldia University 🔗

Bachelor of Science (B.Sc 🔗 .) in Software Engineering

- **Academic Performance:** Graduated with a CGPA of **3.23/4.0** and scored **81.25%** on the National Exit Exam.
- **Core Foundation:** Developed a strong foundation in software design patterns, algorithms, and system architecture through hands-on coursework and team projects.
- **Specialized Stack:** Specialized in full-stack web development using modern technologies, including React , Next.js , PHP, Node.js , and Laravel.
- **Key Projects:** Completed multiple collaborative projects focused on scalable application design, database optimization, and cloud deployment.

Skills

Frontend Development

React, Next.js, , TypeScript, Tailwind CSS, HTML5/CSS3, Responsive & Mobile-First Design

DevOps & Deployment

Docker, Docker Compose, CI/CD Pipelines, Vercel, Render, Cloud Deployment

Soft Skills

Leadership, Teamwork, Problem Solving, Critical Thinking, Communication, Responsibility, Fast Learning

Backend Development

Node.js, NestJS, Fastify, Express.js, Laravel, PHP, RESTful APIs, JWT Authentication

Architecture & Design Patterns

MVC, Clean Architecture, Component-Based Design, API-First Development

Database Management

PostgreSQL, MySQL, MongoDB, Prisma ORM, Eloquent ORM, Database Design & Optimization

Tools & Version Control

Git, GitHub, VS Code, Postman, Firebase, Clerk, Cloudinary

Languages

Amharic

English

Projects

Digital Savings and Microloan Management System | **Technologies:** Spring Boot, Next.js, PostgreSQL, Spring Security, Tailwind CSS

- Developed a comprehensive web-based platform designed to digitize and streamline savings and cooperative operations for organizations.
- Implemented role-based access control (RBAC) supporting distinct operational tiers for Administrators, Managers, and Assistants.
- Handled full member lifecycles, dual-type savings structures (Formal and Informal), secure financial transactions, and capital equity share tracking.

Hotel Booking System | **Technologies:** Laravel, PHP, MySQL, Docker

- Developed a robust backend-focused web application for hotel reservations and management.
- Implemented core features including room management, real-time availability tracking, and secure payment integration.
- Applied MVC architecture and built RESTful APIs to ensure clean, scalable, and maintainable backend logic, containerized using Docker.

Courses

02/2026
online

> **eShe Training Program**

> **Ethio Coders Program**

01/2026
online

Artificial Intelligence Fundamentals Nanodegree 

Udacity

Developed a strong understanding of AI concepts, machine learning models, and neural networks. Applied Python and TensorFlow to build intelligent applications and gained insight into modern AI-powered development workflows.

02/2026
online

Programming Fundamentals Nanodegree 

Udacity

Gained hands-on experience in core programming concepts, algorithmic thinking, and problem-solving techniques. Built foundational skills in Python and software development principles, preparing for advanced backend and full-stack projects.

01/2026
online

Android Developer Fundamentals Nanodegree

Udacity

Learned Android application development using Java and Kotlin. Designed responsive mobile interfaces, implemented core SDK components, and built production-ready apps with Firebase integration and real-time data handling

02/2026
online

Data Analysis Fundamentals Nanodegree

Udacity Acquired practical skills in data collection, cleaning, visualization, and statistical analysis. Used Python libraries such as Pandas and Matplotlib to derive actionable insights from real-world datasets and support data-driven decision-making

Certificates

Ethio Coders Program

eShe Training Program

Customized Entrepreneurship Training

-Entrepreneurship Development Centre (EDC - Ethiopia), Addis Ababa (December 2021)

Employability Skills and Job Readiness Training

- Woldia University (November - December 2025)
